Airforce

A large new airfield is under construction between BIELANY and BOERNEROWO near WARSAW. The runway is approximately 2 kilometers long. Forced labor will probably be employed there because barracks encircled with barbed wire and watch towers are being built.

Large military airfields are at MODLIN, NOWY DWOR, DEBLIN, WROCLAW and SZCZECIN.

All of them are equipped with goniometric stations but only the WARSAW airdrome is provided with radar.

From 20 to 40 Soviet airplanes, ensuring liaison between Russia and Eastern Germany, use the WARSAW-OKECIE airport daily. They are not subject to any control or formalities.

DATE OF OBSERVATION: unknown

EVAL. COMMENT: Source : fairly reliable
Information: possibly true, unconfirmed
