WORKS CARRIED ON AT THE HARBOR OF MANGALIA

Since the autumn of 1950, works have been in progress at the harbor of MANGALIA, to transform it from a civilian into a military port. The excavation of the bottom of the harbor is made by four dredgers, formerly used on the SULINA canal.

During the transfer trip of these dredgers, which was made via CONSTANTA, soldiers and officers were noted on board of them.

It is probable that the transformation works have by this time been completed.

DATE OF OBSERVATION: September 1951

EVAL. COMMENT: Source : reliability unknown  
Information: possibly true, unconfirmed.
