Organization And Personnel Of BUCHAREST
Building Firm

Following details regarding the activities of the No. 4 branch of the firm "Sovromconstructia" in via Stefan cel Mare No. 117 in BUCHAREST were reported.

This firm has a special section dedicated to water sounding. Personnel and machinery of this section was sent to BANEASA, PANTELIMON, BUFTEA and COMUNA ROSU, near BUCHAREST to take soundings. They are looking for water supplies for the needs of the capital.

The goods depot is in via Muncii No. 158, BUCHAREST.

The workshop for sounding machinery repairs is in the Head Office in via Stefan cel Mare. There are two large lathing sections, a special tube finishing section, an assembling section and a large motor repair workshop.

The director general of the firm is a brutal and energetic Soviet named SATOLOV (fnu); his only aim is the prosperity of the firm and to this end he imposes all regulations and work quotas without any consideration for his staff.

BREMEN (fnu) is joint manager and is completely trusted by the Party and his Soviet "boss."

The chief accountant is PETRESCU Ion; the cashier is ANASTASESCU (fnu), both doubtful Communists who behave humanly toward the workers.

BACIOIU Dumitru, the political adviser, an ardent Communist and Party spy, acts as dictator, helped by his comrades DREVA (fnu) and PARASCHIV Stoica. They supervise the activities and behavior of the 200 workers in the workshops and administrative departments, and are feared by everybody as they are convinced Communists.
