* * *

"The amnesty for seduced refugees proclaimed by our Government caused panic among the leaders of the bourgeois exiles in the West. The situation there is such that even big American journals, e.g. NY Herald Tribune is dealing with it: "In case a greater number of refugees returns on the basis of the amnesty to CSR, this would be a real failure of the Western propaganda.

A constantly growing number of refugees is returning home and the failure, forecast by the NY Herald Tribune, knowing the situation, will not have to be waited for, for a long time. The leaders of the treacherous bourgeoisie in the West are sending desperate SOS to the American Government and at the same time they suggest how to deal with the amnesty. NEW YORKSKY DENNIK even handed in a suggestion about how to keep refugees in the camps. This paper writes: "First of all it is essential to give food to the refugees." This sentence is a frightful admission of the situation in the camps. As second point NY DENNIK suggests the following: "In American, British and French army stores more goods and food is rotting a year than one would need for the refugees. In case it would be possible to sort out the food stores in the army a few weeks or months earlier and send them to the refugee camps. where would be no hunger.

This is even a worse admission of the situation into which the ZENKLS and CERNYS got the seduced refugees. Because, what is actually the NY DENNIK suggesting? You should give bad food tins to the refugees in the camps instead of to the rats. This is the only advice the prominent refugees can give to the ordinary ones in their desperate situation in these camps of hunger, lies and dirt.

And rotten tins for which the NY DENNIK begs should save the ordinary refugees, seduced by the mendacious propaganda of the recruiting officers. They think that it will be enough to supply rotten tins, meant to be thrown away to the refugees and with this act everything will be saved. It will not be.

Those who returned home and again are happy here, confirm that rotten tins cannot keep hundreds more people, who are longing for their homeland."

The other leaders of the council were similarly different branches of business: the well known industrialists KARLICK and KARLICK, PARADIK, those the publisher's activity. For the money he gets from the press of the US, and works in US he bought 2 journals - the NY DENNIK and NY LIGHT, in which he analyzes the opinions of the members of the council according to the capitalist system. PARADIK was really not of PARADIK, does not own journals, but makes it for it by publishing a lot of resolutions and publishes his political opinions in all sorts of circulars.

STEFAN KUCHAR, who recently returned on the basis of the money, when failed to KARLICK's wife. At one occasion Mrs. Karlick complained. It results to not know any my husband talks such a lot about politics, after all we left the Republic for peace and order. He needs it and another word to this.

The mentioned cases of the leaders speak for themselves, that they have nothing in common with any ideals or political activity. But for the moment's sake, he would like to add a few words about the structure form the so-called COUNCIL FOR FREE CZECHOSLOVAKIA since their appearance. To make it quite clear the function of chairman of that organization - which according to the words of one of the refugees, Prof. ELAVY has no greater power than any company in a restaurant, belongs in a time and of dollars. That is the reason that everyone wants to become chairman, even if they shout to the world that they do not care for money, and that they are doing everything out of kindness and that to give the self something to eat and let the night remain alive, they thought up the idea of elections, which one of the refugees named "system of rotation and bats". All the names of the members of the Council are written on a piece of paper, are turned into a hat and then pulled out again. Thus gradually everyone gets the turn of the function and of course that is how the treacherous life goes on like a sleep, while the abused victims, who were deceived by the mendacious propaganda live in terror in the refugee camp. It is not surprising that the traitors do not dare to explain the conception of their ideas, but even the most stupid of them can see that, that is of their kind.
