OIL INDUSTRY

Several villages near MOINESTI were forcibly evacuated, the inhabitants were sent to other regions and several oil-wells have been drilled in the evacuated area. Two refineries are located at MOINESTI. One of them is already producing 150 railway tank-loads of gasoline daily. Another refinery is about to be finished and is expected to produce 250 to 300 railway tank-loads daily. The machinery and all the installations were taken from an old refinery at MALUL VULPII, located on the right side of the main road from BAICOI to CAMPINA, about one kilometer outside BAICOI.

DATE OF OBSERVATION: July 1951

EVAL. COMMENT:

Source : fairly reliable;
Information: probably true, first item
confirmed by other sources.
