14 Students Expelled From PÁPA Agricultural Highschool
For Deserting Summer Vacation Works.

SOURCE VIENNA: Confidential Source.

DATE OF OBSERVATION: Current period.

SUMMARY: See headline, please.

EVALUATION COMMENT: "Szabad Ifjúság" of 31 July 1953 reprimanded six students of a SALGÓTARJÁN highschool for having "deserted" the summer vacation works. Such reprisals as the one reported on in this report are, so far, UNCONFIRMED in our files. In case of special /professional/ schools like the school under reference, such reprisals may, however, be applied since participation in the summer works can be considered part of the regular curriculum and those who desert them can be ousted from school for this reason. For background information we add that "Szabad Nép" of 11 July 1953 reported on a five-week summer vacation "practical training" of 360 students from several highschools at KOMLÓ, where a large-scale town construction project is under way.

x x x

A Pápai Mezőgazdasági Technikum növendékei közül 14 hallgatót kizártak a technikumból, illetőleg nem fogadták el az új tanévre való beiratkozásukat, mert az "önként vállalt" nyári mezőgazdasági munka önkényes otthagásával megsértették az iskola növendékeire kötelező tanfegyelmet és a technikum növendékeihez méltatlan társadalomellenes magatartásuknak adtak kifejezést.

End.
